

Department of Health and Human Services (HHS)
National Institutes of Health (NIH)
National Cancer Institute (NCI)
Division of Cancer Treatment & Diagnosis (DCTD)
Developmental Therapeutics Program (DTP)
Toxicology and Pharmacology Branch (TPB)

The National Cancer Institute (NCI) is seeking a candidate with a degree in the field of pharmacology or an appropriate discipline of the biological, medical, or veterinary sciences that includes at least 30 semester hours in chemistry and physiology, and 12 semester hours in pharmacology.

The candidate will be responsible for coordinating and evaluating safety testing of investigational cancer therapies, including biopharmaceutical agents, used in multiple research studies; developing and evaluating research protocols for appropriateness of study design and use of pharmaceutical information; developing pharmacokinetic study design initiatives; assisting in all phases of contract solicitation, including review and award for pharmacology studies; and evaluating and interpreting pharmacological data from both nonclinical and clinical studies.

This is an exploratory ad to gauge interest and a possible candidate pool. The vacancy announcement to fill these positions will be posted on usajobs.gov at a later date.

Qualifications: Candidates must be U.S. citizens. Compensation for this position is commensurate with the individual's qualifications and experience as permitted within Federal Government appointments.

How to Apply: Prospective applicants should express their interest to: Elizabeth R. Glaze, Ph.D., D.A.B.T., Chief, TPB, DTP, DCTD, at: glazee@mail.nih.gov.

HHS, NIH, and NCI are Equal Opportunity Employers
