

**Department of Health and Human Services
National Institutes of Health
National Cancer Institute
Division of Cancer Treatment and Diagnosis**

The Division of Cancer Treatment and Diagnosis (DCTD) <https://dctd.cancer.gov>, National Cancer Institute (NCI), is seeking expressions of interest from highly qualified physicians and physician-scientists for potential opportunities across DCTD. Current recruitment planning includes physician opportunities in multiple DCTD programs and encompasses both supervisory and non-supervisory physician roles.

DCTD supports and facilitates the discovery and development of new and improved approaches to the diagnosis, treatment, and prevention of cancer. Physicians and physician-scientists across DCTD contribute clinical, scientific, and programmatic expertise to NCI-supported research, including clinical research, therapeutic development, imaging, diagnosis, and other areas of cancer research.

DCTD is particularly interested in physicians and physician-scientists with clinical, research, and leadership expertise relevant to its cancer research mission. Areas of interest may include medical oncology, pediatric oncology, cancer diagnosis and imaging, experimental therapeutics and drug development, clinical trial development and oversight, translational research, and scientific leadership of collaborative cancer research programs.

Depending on the program and position, responsibilities may include providing scientific, clinical, and programmatic leadership; evaluating research concepts and proposals; overseeing research portfolios; contributing expertise in assigned disease, diagnostic, imaging, therapeutic, or research areas; and collaborating with investigators and research partners across the cancer research community.

Through these roles, physicians have the opportunity to contribute to DCTD's cancer research mission and to NCI-supported efforts to improve the diagnosis and treatment of cancer.

Candidates should possess an M.D. or equivalent medical degree with an active U.S. medical license and demonstrate expertise relevant to the applicable DCTD program and position. Depending on the opportunity, relevant backgrounds may include oncology, clinical research, cancer diagnosis, cancer imaging, experimental therapeutics, pediatric oncology, clinical trial development and oversight, translational research, and/or leadership of collaborative cancer research programs.

Additional qualification requirements will be specified in the applicable vacancy announcement.

Compensation will be commensurate with the individual's qualifications and experience and consistent with applicable Federal Government appointment authorities.

This is an exploratory advertisement intended to gauge interest and identify a potential candidate pool. It is not a formal vacancy announcement. Any vacancy announcements to fill these positions will be posted on USAJOBS.gov and/or through other applicable NIH hiring mechanisms.

Interested candidates are encouraged to submit a **curriculum vitae or résumé and a brief statement describing their clinical/research expertise and area(s) of interest** to: NCIDCTDvacancyinquiry@mail.nih.gov

For additional information about DCTD and its programs, please visit the National Cancer Institute website.

HHS, NIH, and NCI are Equal Opportunity Employers.

The NIH and NCI are dedicated to building a diverse community in its training and employment programs and encourages the application and nomination of qualified women, minorities, and individuals with disabilities.
